Statement

You provide no calculations or figures as to how the amounts were determined. How did these numbers indicate what LA Mesa's portion will be? The Bi-Monthly Base Charge is nearly 22% more by 2024, which is an extreme increase without any proof.

I do not oppose an increase: water is scarce in our region and should be highly valued. I oppose the trend of raising the fixed charge more than the proportional one. It does not reward the consumer for saving water: just the opposite of what would make sense in a climate emergency.

Re: Public Hearing for Proposed Sewer Rate Adjustments

Sirs and Madams

I am a home owner in the City of La Mesa and I oppose the rate increases as stated in the Notice of Hearing that I received in the mail.

I feel that the percentage of increase from the current rate to the proposed July 2024 is unreasonably high. As with many, I am on a fixed income and increases such as those stated are going to be a matter of my going without something else equally critical. My social security income will not see increases nearly this high. As it is the monthly base rate for using nothing at all is ridiculously high. I am a single person who is much more conservative with my water use than the average person or home and yet my base rate is frequently higher than my water/ sewer usage rate.

You need to go back to the drawing table with this calculation, it is simple too high.

You also need to collect more from the businesses in the city, many of which are using a tremendous amount of water and sewer services and NOT paying their share if they pay at all according to what I read in the news.

Sincerely,

Linda Greene

I do not agree with rate increases. The city should look at ways to save money elsewhere to cover any rising costs. I should not have to pay for infrastructure failures

I oppose ANY INCREASE IN sewer rates.
With All the new housing units being built there
Should be lots of new Revenues generated by
even just the base charges.
